

In the Claims

The claims have been amended as follows:

1. (Currently Amended) A completely water-soluble corrosion inhibitor composition comprising:

(a) between about 90 and about 99 percent by weight ammonium benzoate; and

(b) one or more additive components in an amount of between about 1 and about 10 percent by weight of said composition, said one or more additive components being selected from the group consisting of silica, triazoles, and wetting agents

2-4. (Cancelled).

5. (New) A corrosion inhibitor composition comprising an aqueous solution having between about 0.25% and about 5% by weight of an inhibitor material, said inhibitor material including:

(a) between about 90% and about 99% by weight ammonium benzoate; and

(b) between about 1% and about 10% by weight of one or more additive components selected from the group consisting of silica, triazoles, and wetting agents.
